

With students having returned to schools, school photos will change to a professional and effective **Composite style**.

## WHAT IS A COMPOSITE STYLE?

In a Composite product, students are photographed individually and the group is created digitally using a Composite template.

**This will eliminate the need for students and teachers to be grouped together in close contact with each other, or MSP Photography employees**

Our priority is to ensure the safety and wellbeing of our schools and their students, our employees and the wider community.
