

MEET THE TEAM – RENCONTRE L'EQUIPE

Interviewer - Revana
Interviewed - Aurora

Revana - **What is your name and which year are you in?**
Aurora - *My name is Aurora Eiermann Collins and I am in CM2 D.*

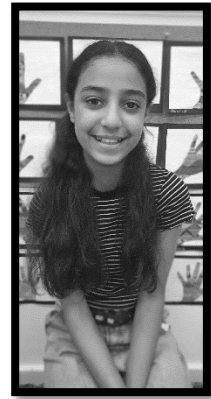

Revana - **What is your favorite food?**
Aurora - *My favorite food is bean tacos.*

Revana - **What do you love doing out of school?**
Aurora - *I like to read adventure books and stand-up surf in South Maroubra!*

Revana - **What do you want to do when you grow up?**
Aurora - *When I grow up I want to be an astronaut, an author, an artist, a chef, an astrophysicist and a superhero!!!*

Revana - **What is your spirit animal?**
Aurora - *My spirit animal is a chinchilla.*

.....

Interviewer - Aurora
Interviewed - Revana

Aurora - **What is your name and which year are you in?**
Revana - *My name is Revana Al Rais and I am in sixème B.*

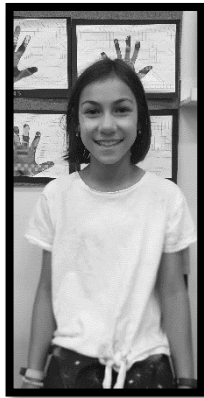

Aurora - **What is your favourite food?**
Revana - *My favourite food is sushi, grilled salmon, tuna, cucumber etc...*

Aurora - What do you love to do outside of school?
Revana - *I like to do acting, gymnastics, horse riding and reading.*

Aurora - What do you want to do when you grow up?
Revana - *When I grow up I want to be a computer scientist, veterinarian, an architect and an actor.*

Aurora - What is your spirit animal?
Revana - *My spirit animal is either a dog, a Freisian black horse, an unicorn or a dolphin!*

.....

Interviewer - Katherine
Interviewed - Emeline

Katherine - What is your name and class?
Emeline - *My name is Emeline Thao and I am in CM1c with Agnes*

Katherine - Why did you choose newspaper club?
Emeline - *Because once my parents put me in a newspaper club out of school*

and I loved it, so when I saw there was a newspaper club I wanted to join.

Katherine - What do you do outside of school ?
Emeline - *I do swimming, netball and tennis*

Katherine - What do you want to be when you grow up?
Emeline - *To be honest I don't really know but I think it would be nice to be a big mathematics expert.*

Katherine - What is your favorite thing to research and write about?
Emeline - *I really like to research and write about ways to help the planet with climate change.*

Katherine - How long have you been at LCS?
Emeline - *I have been here since PS.*

.....

Interviewer - Julia
Interviewed - Pauline

Julia - What is your name and what year are you in?
Pauline - *My name is Pauline Delloye. and I am in year 5.*

Julia - How long have you been at Lycee Condorcet?
Pauline - *I have been at this school for about three years.*

Julia - What is your favourite food?
Pauline - *I love pizza because my dad makes it homemade in our pizza oven.*

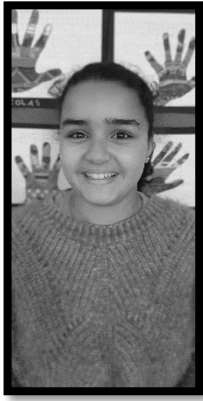

Julia - Have you always lived in Australia? If not where else have you lived and gone to school?
Pauline - *I haven't always lived in Australia, but I used to live in London but I was too little to go to school back then.*

Julia - What do you love to do outside of school?
Pauline - *I love cooking desserts because my favourite part is to lick the bowl.*

Julia - What is your spirit animal and why?
Pauline - *My spirit animal is a horse because I love horse riding.*

Julia - What do you want to be when you grow up?
Pauline - *I want to be a famous chef that works in a very fancy restaurant.*

.....

Interviewer-Pauline
Interviewed-Julia

Pauline - What is your name and what year are you in?

Julia - My name is Julia Abdelaty and I am in year six.

Pauline - How long have you been at lycée Condorcet?

Julia - I have been here for 8 years.

Pauline - What is your spirit animal? Why?

Julia - My spirit animal is a cat because I have a cat called Helga.

Pauline - What do you love to do outside of school.

Julia - Outside of school I like to swim, cook and play hockey.

Pauline - Have you always lived in Australia? If not where else?

Julia - I was born in Egypt. I lived there for 4 years then moved to Australia

Pauline - What is your favourite food?

Julia - My favourite food is cheesecake.

.....

Interviewer - Mégane
Interviewed - Ava

Mégane : Quel est ton prénom et en quelle classe es-tu ?

Ava : Je m'appelle Ava Puglisi et je suis en 6eme C.

Mégane : Depuis combien de temps es-tu au Lycée Condorcet Sydney ?

Ava : Je suis au Lycée Français de Sydney depuis la Petite Section. J'aime beaucoup cette école mais je pars en école australienne en décembre.

Mégane : Que veux-tu faire quand tu seras grande ?

Ava : J'ai envie d'être une présentatrice de l'actualité à la télévision. Toutefois, ce n'est pas un projet définitif et cela peut encore changer.

Mégane : Pourquoi as-tu choisi le club "Journalisme" ?

Ava : J'aime écrire des articles et les enseignantes du club sont formidables. De plus, certaines de mes amies y participent aussi et c'est un bon moment de partage.

Mégane : Qu'est-ce que tu aimes faire en dehors de l'école ?

Ava : J'aime beaucoup de choses !!! Cuisiner, faire du shopping, concevoir et agencer ma nouvelle chambre. J'aime aussi faire de l'art, me reposer devant Netflix et jouer dehors avec mes voisins.

Mégane : Quel est ton plat préféré ?

Ava : J'aime les sushis en général et particulièrement les sushis avec du riz blanc, du thon et de l'avocat. Surtout je n'oublie pas la sauce soja !

.....

Interviewer - Ava
Interviewed - Katherine Warton

Ava - What is your name?
Katherine Warton - *My name is Katherine and i am in CM1A.*

Ava - What is your favourite food?

Katherine Warton - My favourite food is spaghetti with tomato sauce and cheese.

Ava - What do you love to do outside of school?

Katherine Warton - *Outside of school I like to ride my bike to centennial park and watch the sunrise at the beach.*

Ava - What do you want to be when you grow up?

Katherine Warton - *I haven't really decided but I think I would like to be a teacher.*

Ava - How long have you been to the Lycee Condorcet?

Katherine Warton - *I have been at the Lycee Condorcet since GS.*

Ava - What is your favourite topic to write about and why?

Katherine Warton - *My favourite topic to write about is nature because I find it interesting and like it.*

.....

Interviewer - Mathilde
Interviewed - Penelope

Interviewer - Penelope
Interviewed - Mathilda

Mathilde - What is your name and which year are you in?

Penelope - *My name is Penelope Mathey and I'm in year 4.*

Mathilde - Have you always lived in Australia, if not where else have you lived?

Penelope - *I have not always lived in Australia. I used to live in Laos.*

Mathilde - What do you want to be when you grow up?

Penelope - *I want to be a rock scientist (geologist)*

Mathilde - What do you like to do out of school?

Penelope - *I like to draw, watch funny movies and have sleep-overs with my friends*

Mathilde - What is your favorite food?

Penelope - *My favourite food is pasta (spaghetti).*

Penelope - What is your name and which year are you in?

Mathilda - *I am Mathilde Edwards and I am in year 5.*

Penelope - Why did you choose the NewsPaper club?

Mathilda - *I chose the NewsPaper club because my dad semy forced me because he is a journalist.*

Penelope - Who is your favourite role model and why?

Mathilda - *My favourite role model is David Attenborough because I love his shows and he helps the world.*

Penelope - What's your spirit animal and why?

Mathilda - *A narbel because I love swimming and because My grandmas friend said so.*

Penelope - What is your favourite topic to research and write about and why?

Art and drama in real life because I think it's interesting.

Penelope - **How long have you been in the Lycee Condorcet?**

Mathilda - *At the beginning of Ps (seven years)*

.....

Interviewer - Dina
Interviewed - Blythe

Dina - **What is your name and which year are you in?**

Blythe - *My name is Blythe and I'm in CM1 C.*

Dina - **Have you always lived in Australia? If not where else have you lived and gone to school?**

Blythe - *I've been to England, France and Malaysia just to name a few but I've only been homeschooled. The only place I've really been to school is well here and in Adelaide.*

Dina - **Who is your role model and why ?**

Blythe - *My role model is Enid Blyton because she writes magnificent stories and her characters are great and very funny!*

Dina - **What do you want to be when you grow up?**

Blythe - *When I grow up I want to be an Archeologist or an Actress.*

Dina - **What's your spirit animal?**

Blythe - *My spirit animal is a rabbit.*

Dina - **What is your favourite food?**

Blythe - *I know this is weird but it's actually cauliflower cheese.*

.....

Interviewer - Blythe
Interviewed - Dina

Blythe - **What is your name and which class are you in?**

Dina - *My name is Dina and I'm in CM2c.*

Blythe - **How long have you been in Lycee Condorcet?**

Dina - *I'm not sure but I think it was... Since the start.*

Blythe - **What do you love to do outside of school?**

Dina - *I love to go swimming.*

Blythe - **Who is your favorite role model and why?**

Dina - *It's Rick Riordan because he's stories are*

great and his books talk about Greek Gods.

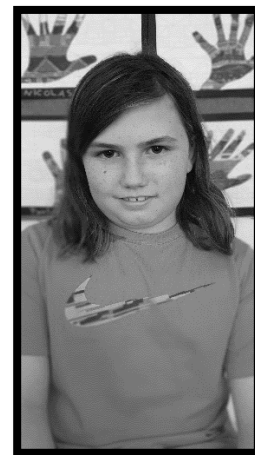

Blythe - **What do you want to be when you grow up?**

Dina - *I want to be a cruise captain.*

Blythe - **Why did you choose the newspaper club?**

Dina - *Because I like typing, I like computers and I like writing articles.*

.....

Interviewer - Diane
Interviewed - Justine

Juliette - *I chose the newspaper club because I like to write about news.*

Interviewer - Nelson
Interviewed - Anaïs

Nelson - What's your name?

Anais - *My name is Anaïs*

Nelson - Have you always lived in Australia? If not where else have you lived and gone to school?

Anais - *I have always been in Australia at LCS.*

Nelson - What do you want to do when you grow up?

Anais - *I don't know yet.*

Nelson - Why did you choose the Newspaper Club?

Anais - *Honestly, I joined the Newspaper Club because I wanted to be in Miss Leah's class.*

Nelson - What is your spirit animal and why?

Anais - *My spirit animal is the snake because I am sneaky, poisonous and energetic.*

Interviewer - Anaïs
Interviewed - Nelson

Anais - What's your name?

Nelson - *My name is Nelson*

Anais - What is your favourite topic to research and write about and why?

Nelson - *I like researching about what is going on around the world and politics because I like to know things and I find it interesting.*

Anais - Why did you choose the Newspaper Club?

Nelson - *I chose the Newspaper Club because I wanted to write stuff about the school.*

Anais - Who is your favourite role model and why?

Nelson - *My favourite role model is Eden Hazard because he's good at soccer.*

Anais - What do you want to be when you grow up?

Nelson - *When I grow older, I want to start inventing airplanes because I love to draw and I love airplanes.*

Animal baby boom for Aussie zoos in lockdown!

By Justine

While the world has been in lockdown zoos around the world have been welcoming a lot of cuddly and cute baby animals to the world.

Keepers at Melbourne zoo have seen a room called the “ baby room” of otters ,snow leopards and cotton-top tamarin monkeys.

Victoria’s Healesville zoo also saw its female baby platypus, Storm, emerge from her burrow for the first time ever and Chimbu the baby tree kangaroo. Lot’s of zoos in the world are having trouble entertaining the animals. So they are entertaining them by (taking them to gallery’s, mini robots...!

.....

Andean condor flies for five hours without flapping its wings...

By Blythe

Scientists have found out that the Andean condor can fly for five hours without flapping its wings.

This is because the Andean condor uses wind currents to stay afloat without flapping their wings. For the first time, a team of scientists used special equipment they called “daily diaries” to eight Andean condors that lasted up to two hundred and fifty hours of flight time.

Amazingly, most of the birds used just one percent of their howl body to flap their wings, which is just a tiny percentage of their body mostly during take off.

Learning how to ride wind currents allow most birds to long distances while minimizing their wing beats.

Scientists who study flying creatures generally consider two types of flights: Flapping and Soaring Flight.

The Andean Condors extreme skill at soaring includes flying for hours a day to look for its food.

.....

Rae the ‘unicorn puppy’ has one ear that looks like the horn of the mystical creature

By Justine

A one-eared puppy that looks like a unicorn is capturing hearts around the world.

Rae is a golden retriever pup who lost her ear at birth. Since then Rae's right ear has moved to the center of her head.

Rae's owner Brianna Aardema thought she was a unique pup and adopted her straight after her emergency operation.

The dog's breeder isn't sure how she lost her ear but Brianna thinks it gives her character.

Since then Ray has been living a lovely life.

.....

Two giant pythons drop in for a visit

By Nelson

On the 31 of August 2020 a Queensland man came home to a gaping hole in his kitchen ceiling and two giant snakes making themselves comfortable on the floor.

David Tait had the shock of his life on Monday morning when he entered his Lacey's Creek home near Dayboro, northwest of Brisbane.

The carpet snakes, 2.8m and 2.5m long, together weighed an estimated 22kg, so heavy they smashed a hole in the kitchen ceiling.

"They're some of the biggest and fattest I've ever seen," said Steven Brown, who runs a service called Brisbane North Snake Catchers and Relocation.

"They might be two males who were having a fight over a female – it's hard to tell between males and females unless they're mating.

"There could still be a female up in the roof, but there was no crawl space so I couldn't get in to see."

Mr Tait said he had occasionally seen snakes basking* on his metal roof on cold mornings, but had never heard movements in his roof before.

"We have a lot of bush around here so you do see snakes," Mr Tait said.

"When I came back this morning there was a large slab (of ceiling fibro) on the kitchen table.

"I guessed what had happened and went looking. I found one snake in the bedroom and we found one in the lounge room.

"Steven was really professional. He gave them a pat to see if they would cause any trouble, sort of pushed their heads away and opened a black bag and they just crawled inside.

"It was over pretty quickly, but I certainly didn't want to handle them."

Mr Brown said although carpet snakes could grow to 4m long, 3m was considered about the largest size in the wild.

He relocated both at a state forest about 1km away.

Although carpet snakes like those that visited Mr. Tait's kitchen are not venomous, if you are living near the bush always check for snakes.

Mice keep muscles after one month in on the ISS

By Katherine & Emeline

A research team led by Dr Se-Jin Lee, sent 40 female mice to the space station in December 2019.

In a paper, Dr Lee said the 24 regular untreated mice lost up to 18 per cent muscle and bone mass in weightlessness as expected. But the eight “mighty mice”, which launched with double the muscle, maintained their bulk.

Some ordinary mice that were given a dose of the mighty mice drug after returning built up more muscle than their companions.

“The only silver lining of COVID is that we had time to write it up very intensively and submit the results for publication” said Dr Emily Germain-Lee who is also Dr Lee’s wife

While they were happy with their findings, the two know that more work needs to be done before giving it to people (without causing serious damage).

The scientists finished their experiments just in time, as COVID was about to hit the US.

Though it is not good to test products on animals, the results hold promise for preventing muscle loss in astronauts on space trips long enough to cause it, as well as people on Earth who have to stay in bed or use wheelchairs.

.....

World’s loneliest elephant free to find friends

By Dina

On September 7th 2020 an elephant famous for being the “world’s loneliest” will at last be released from the Pakistani Zoo after a very long time.

Kaavan the elephant has lived at a zoo in the Pakistan capital of Islamabad in terrible conditions for more than 35 years.

Martin Bauer, an agent for animal rights, said the elephant has been finally given medical approval to travel, most likely to Cambodia, where he will find friends and better conditions.

In May, Pakistan’s supreme court ordered the Marghazar Zoo closed because of its extremely bad conditions.

“Vets gave the overweight elephant Kaavan a full medical examination at the zoo on Friday,” said Mr Bauer.

Rescuing Kaavan from the zoo attracted the attention of animal activists around the world, who have fought for his relocation since 2016.

“Unfortunately, the rescue comes too late for two lions that died during an attempted transfer at the end of July, after local animal handlers set a fire in their enclosure to force them into their transport crates,” Mr Bauer said in a statement released on Saturday.

“His recovery will be a long one,” said Mr Bauer, “adding that Kaavan’s wounds are more than just physical. He also suffers behavioural issues.”

Kaavan, who lost his partner in 2012, has battled loneliness as well as poor living conditions. Both have taken their toll.

This is why we should not keep animals in cages or in extremely bad conditions. We should let animals free and

not keep them in zoos like Kaafan.

Thor (Chris Hemsworth) libère les diables de Tasmanie

écrit par Mathilde

Cela fait 3 000 ans que les diables de Tasmanie sont de retour à l'état sauvage en Australie continentale!

Au total, 11 diables de Tasmanie ont été relâchés dans la nature à Barrington Tops en Nouvelle-Galles du Sud. Cela fait partie d'un projet australien pour restaurer et protéger toutes sortes d'espèces indigènes en les déplaçant dans des sanctuaires sauvages où elles sont à l'abri de choses comme les voitures et les animaux sauvages!

L'ambassadeur de WildArk Chris Hemsworth (Thor) et sa famille sont venus aider à la sortie. Les diables de Tasmanie n'étaient pas toujours tasmaniens, ils vivaient en Australie mais ont ensuite disparus. Le nouveau programme semble prêt à changer tout cela et avec un peu d'aide, ce groupe est sur un bon départ pour sa nouvelle vie.

“HeroRat” Magwa Wins Gold Medal His Incredible Life Saving And Bravery

by Ava and Lili

It may seem odd to hear that a rat has won a medal, but it's true! He won this medal for bravery and devotion to duty. He received his award on the 25th of September 2020 by British Veterinary. Over the past 5 years Magwa has saved

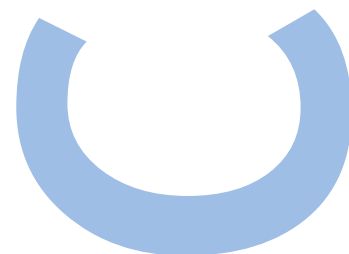

hundreds of lives by detecting 39 landmines and 28 unexploded items in Cambodia.

Magwa is one of many rats that's been trained to detect landmines by Belgium based charity since the 1990s. Every time they completed a task, they would receive a treat for rats, they are really easy to teach and are light enough to walk over the explosives and not launch them. The rats that use their scent are more effective to identify the landmines than the metal detectors.

Magwa is the charity's most successful HeroRat. Magwa can sniff a whole basketball court in 30 minutes and a human would take 4 days with a metal detector! Magwa has cleared about 141,000 square meters.

His effort has allowed communities to work and live, without fear of losing a life or limb. Don't worry Magwa will save the day.

Biggest black hole ever detected

By Revana

Adelaide scientist of the international research team. Have discovered the biggest black hole collision ever found! These black holes collided when the universe was about 7 billion years old. Since then it has been coming towards us.

Physique professor David Ottway explained that massive black holes exist in the middle of most galaxies such as our own, he also explained that black holes become bigger by merging with dead stars.

This is the first detection of a black hole using gravitational waves. It is very big that they didn't think something that big could ever exist! That is because stars 65 to 130 times

the mass of our Sun are believed to disintegrate*, without leaving a black hole behind, at the end of their lives.

The collision, captured by observatories in the US and Europe in May last year. It created a black hole 142 times the mass of our Sun.

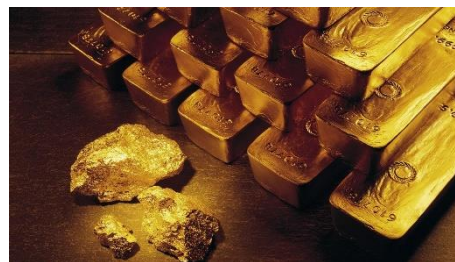

In conclusion, this huge black hole (the mass of the sun) was developed 7 billion years ago and has been coming towards Earth ever since!

So stay on high alert! You never know when it might swallow us up!

.....

Second gold rush on the verge in Queensland

By Juliette & Julia

Victoria's goldfields in Ballarat, Bendigo and Stawell estimate that they are close to a second gold rush. A multitude of exploration licenses have been issued to many companies who are seeking their own chance at fortune.

The state government estimates that there is almost as much gold still left underground, as what was taken out during the gold rush. In the past five years, gold productions have almost doubled, so thousands of jobs are now being provided.

Over 200 exploration licenses have been made and there are still another 120 which have been lodged by the government in recent months.

Most gold is now found in very small amounts such as 5g, however, last year a retiree got lucky and found a 2kg nugget, that was worth 160,000\$ at the time.

Now, because people are more aware about the environment, all the main gold mines are underground which creates less pollution.

If Queensland miners' hints about a second gold rush are true, then Australia will be able to move forward from the COVID-19 crisis to a steady and forward-thinking future.

.....

La Pangée

écrit par Blythe

La Pangée était un méga continent. Il existait il y a environ 335 millions d'années. Il a commencé à se séparer il y a à peu près 175 millions d'années.

La raison pour laquelle les gens pensent que c'est réel est parce qu'un scientifique russe appelé Alfred Wegener a trouvé beaucoup d'animaux identiques dans de nombreux endroits différents et de nombreux continents semblent avoir pu se connecter comme des pièces de puzzle.

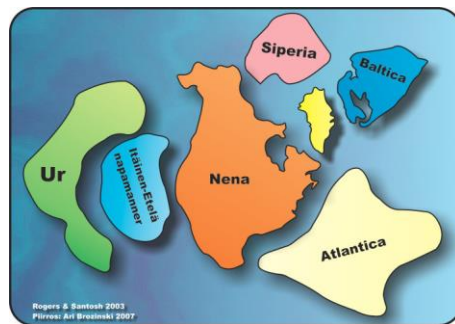

Les scientifiques pensent que la Pangée s'est brisée pour la même raison que les plaques bougent aujourd'hui. Le mouvement est provoqué par les courants de convection qui roulent dans la zone supérieure du manteau.

Il y a environ 200 millions d'années, la Pangée a fait irruption dans deux nouveaux continents Laurasia et

Gondwana Land. Au temps de la Pangée il y avait juste un océan: L'océan Panthalassa.

Est-ce qu'il y avait quelque chose avant la Pangée?

Non, le plus ancien de ces supercontinents s'appelle Rodinia et s'est formé il y a environ un milliard d'années au Précambrien. Un autre supercontinent semblable à la Pangée, Pannotia, a été assemblé il y a 600 millions d'années, à la fin du Précambrien. Les mouvements actuels des plaques rassemblent à nouveau les continents.

Si la Pangée existe encore?

Si la Pangée existait encore, l'humanité se serait encore étendue et aurait formé des pays et autres. Il y aurait plus d'égalité dans le monde, car nous nous connaîtrions tous parce que nous aurions été beaucoup plus exposés l'un à l'autre. Plus de contacts, plus en commun, une histoire partagée.

Aujourd'hui tu peux toujours voir où les continents pourraient aller.

[Australians have firm opinions on the right way to make Aussie party food fairy bread](#)

Fight for fairy bread

By Julia & Juliette

You know about fairy bread right?

Of course you do! We're in Australia. You may have thought that one would not dare to complain about this sublime treat. Well think again...

This whole fairy bread fight started when a Reddit user, (u/Pokemaniacgaming) posted a picture of their fairy bread with the caption "fine dining". The photo attracted criticism as the bread still had the crusts on and wasn't divided into four triangles. But a few of the commenters really stood out by writing "I was trying to figure out why this looked so wrong to me. I just weirdly can't imagine it tasting right if it's not in triangle form". "Even Squares would be acceptable ... If you are going to halve it at least have the common courtesy* and decency* to cut it diagonally," another

commented. “What monster made you eat them with the crusts on?” one questioned.

While some people were stuck with their crusted triangle debate some other people brung up the bread to sprinkle ratio and started a whole new fight. Some people even gave them tips on how to get sprinkles evenly spread out on the whole slice of bread. “100s&1000s density in the centre is also a little too high, hold the shaker at a higher altitude* for more even coverage” or “What about the edge of the bread? Butter the bread and press into a plate of hundreds and thousands rather than sprinkle”

This shows that even though we say that each person is free to believe what they want, as said in the [Australian Constitution “In society, listening to different points of view and the voices of minorities strengthens our democracy.”](#), we still feel the need to criticize and believe we have better ideas.

Quiddich dans la vraie vie

écrit par Mathilde et Katherine

Bonjour les fans de Harry Potter!

Voulez-vous soutenir votre équipe de Quidditch magique locale? Pensez alors à déménager dans l'une des 11 petites villes du Royaume-Uni et d'Irlande qui ont maintenant le statut de ville de quidditch honoraire.

Un nouveau livre a été publié sur le sport magique, avec les onze villes du Royaume-Uni et d'Irlande nommées villes de quidditch honorifiques. Avec leurs propres équipes, bannières et nouveaux fans. Au cas où vous vivez sous un rocher, le quidditch consiste à obtenir des boules magiques à travers des buts en forme d'anneau et à chasser un vif d'or insaisissable.

Il a également pris d'assaut le monde dans la vraie vie avec des tas de moldus (humains dans le monde sorcier) ramassant le manche à balai. Ces amateurs de quidditch disent qu'ils sont super excités de voir le monde sorcier venir dans leurs petites villes et pour ceux d'entre nous à des

milliers de kilomètres, nous pouvons plutôt prêter notre allégeance virtuelle en ligne.

Le Taronga Western Plains Zoo à Dubbo

écrit par Pénélope

Le Taronga Western Plains Zoo se situe à Dubbo. Il faut compter Zoo 5 heures et 19 minutes (en voiture) depuis Sydney.

Au zoo, on a pu emprunter des vélos.

Nous avons pu voir des girafes, des éléphants, des suricats, des zèbres et beaucoup d'autres animaux !

Je vous conseille de visiter le zoo en vélo parce que c'est plus amusant. Vous aurez certainement besoin d'un appareil photo ou un téléphone pour prendre de belles photos.

Ma note : 4 étoiles sur 5. Tout était parfait sauf qu'au début pour rentrer dans le zoo avec les vélos ça a pris du temps (1 demie heure).

HALLOWEEN

Baby yoda deviled eggs

By Mathilde

Baby yoda deviled eggs steps:

1. Boil the egg
2. Peel the egg
3. Cut the egg
4. Take out the inside
5. Cut the avocado
6. Take out the inside
7. Put it in a bowl
8. Mash the avocado with potato masher or fork
9. Cut a lemon
10. Add the lemon juice to the avocado mash
11. Add coriander, salt and pepper
12. Put the guacamole in the egg that is the body
13. Now make a head
14. Make eyes with peppers or raisins
15. Add celery ears
16. Enjoy your baby yoda

Candy stew

By Lili and Ava

Ingredients:

- * Lollipops
- * sour straps
- * gummy bears
- * skittles
- * jelly beans
- * candy cane
- * Fizz Wiz
- * Sour worms
- * Mentos
- * Nerds

How to make:

Step 1: crush the lollipops, skittles, candy cane, mentos and nerds individually

Step 2: mix all of the crushed candy together and place them in one bowl

Step 3: melt the sour straps, gummy bears, sour worms, fizz wiz, and jelly beans individually until it becomes a gooey consistency.

Step 4: Mix all of the crushed and gooey candy together and then put it in a pot.

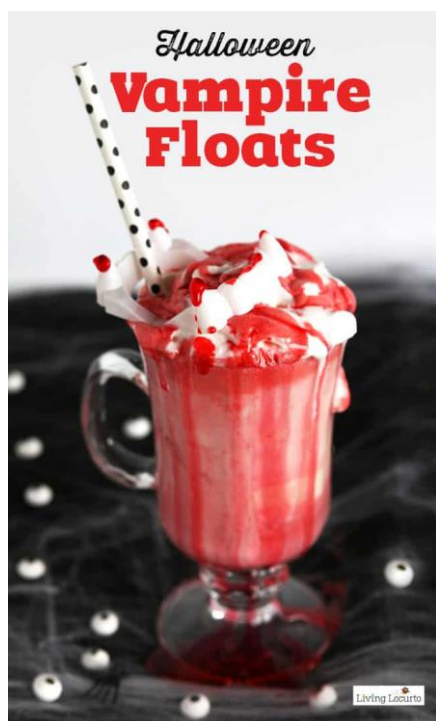

ENJOY !!!

Vampire Floats

écrit par Pauline,
Diane & Dina

Halloween - quelle bonne excuse pour manger des friandises. Voici des idées de biscuits et de boissons effrayantes pour HALLOWEEN !!!

Boisson de VAMPIRE!

Pour la boisson nous avons besoin de :

- du soda rouge
- de la glace à la vanille
- sirop à la fraise
- des bonbons dent de vampire (additionnel)
- de la crème chantilly
- Gel rouge de décoration
- des pailles (en papier ou en métal si tu veux être écologique)

Les étapes :

1. Remplir une tasse aux 3/4 de glace à la vanille.
 2. Verser lentement le soda rouge sur votre glace.
 3. Ajouter de la crème fouettée et arroser de sirop de fraise.
 4. Ajouter une paille et garnir de bonbons dents de vampire.
 5. Ajouter du gel rouge sur les dents avant de servir.
- Prendre du plaisir à le déguster.

Voici une idée de cookies délicieux et effrayants pour halloween.

Pour les cookies nous avons besoin de :

- 1 tasse de beurre, ramolli
- 1 tasse de sucre glace
- 1 oeuf
- 1 cuillère à café d'extrait d'amande
- 1 cuillère à café d'extrait de vanille
- 2 $\frac{2}{3}$ tasses de farine tout usage
- 1 cuillère à café de levure chimique
- 1 cuillère à café de sel
- $\frac{3}{4}$ tasse d'amandes entières
- 1 tube (0,75 once) de gel de décoration rouge

Voici la recette:

1. Mélanger le beurre, le sucre, l'œuf, l'extrait d'amande et l'extrait de vanille dans un bol à mélanger. Battre avec un batteur électrique; ajouter graduellement la farine, la levure chimique et le sel en battant continuellement; réfrigérer 20 à 30 minutes.

2. Préchauffer le four à 325 degrés F (165 degrés C). Graisser légèrement les plaques à pâtisserie.

3. Retirer la pâte du réfrigérateur en petites quantités. Versez 1 cuillère à café à la fois sur un morceau de papier ciré. Utilisez le papier ciré pour rouler la pâte en un biscuit fin en forme de doigt. Appuyez sur une amande dans une extrémité de chaque biscuit pour donner l'apparence d'un ongle long. Pressez le cookie près de la pointe et à nouveau près du centre de chacun pour donner l'impression de jointures. Vous pouvez également couper la pâte avec un couteau bien aiguisé aux mêmes endroits pour donner une apparence plus semblable à celle d'un doigt. Disposez les biscuits en forme sur les plaques à pâtisserie.

4. Cuire au four préchauffé jusqu'à ce que les biscuits soient légèrement dorés, 20 à 25 minutes.

5. Retirer l'amande de la fin de chaque biscuit; pressez une petite quantité de gel

décoratif rouge dans la cavité; remplacer l'amande pour faire suinter le gel autour de la pointe

BAT'S CUPCAKES

By Blythe and Justine

INGREDIENTS

How to make the chocolate cupcake. (this batter makes around 12 cupcakes)

4 tablespoons of unsalted butter
 ¼ of vegetable oil
 ½ cups of water
 1 cup of all-purpose flour
 1 cup of granulated sugar
 ¼ cup plus two tablespoons of unsweetened cocoa powder (not Dutch process)
 ¾ teaspoons of baking soda
 ⅛ teaspoons of salt
 1 large egg
 ¼ cup of buttermilk
 1 teaspoon of pure vanilla extract

INGREDIENTS FOR DECORATIONS:

1 ½ C.frosting
 12 regular oreos
 24 mini oreos
 24 brown m&ms or chocolate chips

INSTRUCTIONS:

1. Frost the cooled cupcakes
2. Split the oreos as carefully as possible so you don't break them.
3. Place the M&Ms on the cream side of the mini oreos to make eyes and then use frosting to place them onto regular sized oreos.
4. Break a mini sized oreo circle in half and use frosting to make them look like ears.
5. Press the bats "face" into your cupcake and then break a regular sized oreo cookie in half to make wings and press them into the frosting!
 And there you have it, a perfect halloween bat!

HALLOWEEN CUPCAKES

By Nelson

INGREDIENTS

- 370g packet chocolate cake mix
- 85g packet lime flavoured jelly crystals
- 180g packet sour worm lollies

- 12 x 12cm lengths licorice strap

METHOD

- Step 1 Preheat the oven to 180° C/160° C fan-forced. Line a 12-hole, 1/3 cup-capacity muffin pan with paper cases.
- Step 2 Make cake following packet directions. Spoon mixture evenly between paper cases. Bake for 18 to 20 minutes or until a skewer inserted in the centre of 1 cupcake comes out clean. Stand in the pan for 5 minutes. Transfer to a wire rack to cool.
- Step 3 Meanwhile, make jelly following packet directions. Pour jelly into a medium heatproof bowl. Refrigerate for 45 minutes or until almost set.
- Step 4 Using a small knife and leaving a 1cm border, cut a 1cm-deep circle from the top of each cupcake. Using a small spoon, scoop out the centre of each cupcake to make a 3cm-deep hole. Spoon jelly into cupcake holes. Poke sour worms into jelly. Insert 1 piece of licorice into jelly in each cupcake, to form a handle. Serve.

RECIPE NOTES: Spoon jelly into cupcakes just before serving.

HALLOWEEN poem (spooky addition)

*By Emeline
& Blythe*

How the humans beat the zombies

Once a zombie
And his enemy
Made deal
To fight without a shield
The humans were very mad
because their friends hand
Got cut off during the war
Because of a stupid law.

The humans went for a break
and made a plan,
It was as good as BAM BAM
BAM!
They started to fight in the
mud
But the water was created by
blood
Slishy Slosy Udd Udd Un
But finally the humans
won!!!!
HOORAY!!!! They all
shouted, and that is where
the story ends.
