

Ever wondered what effect your reassurance has on your child?

PARENTAL REASSURANCE STUDY

Is your child aged between 7-13? We are looking to recruit parent and child dyads to participate in a short study investigating the effect of parental reassurance on child development.

WHAT DOES IT INVOLVE?

This entire study will be conducted externally – you will NOT need to come into the University. Parents and children will be asked to complete a short questionnaire online and then be involved in a task that will take approximately 20 minutes and will be conducted over a videoconference call. So you won't even need to leave your house!

INTERESTED?

Contact: madeleine.arnold@students.mq.edu.au

WHAT ARE THE BENEFITS?

- You will go in the running to win **one of THREE \$50 Coles Group vouchers** to spend at numerous stores eg. Coles, Liquorland, Officeworks, Target and more!
- You will contribute to the body of research regarding children's development which will help to inform the development of more effective and integrative treatment programs to support children and their parents
