## In the Piggybank

I've got 6 coins in my piggybank.

So! I've got 4 coins in my piggybank and I've got more money than you.

So! I've only got one coin in my piggybank and I've got more than both of you!

Piggyback

Can everyone be right?

Show what coins might be in each piggybank to make the statements true.

What different ways can you find to make the statements true?

**Key Concept:** Money – equivalence of coins
